Phone: 33 (0)6 73 32 53 52

TRUCK

All the equipment of the Percussions de Strasbourg will be sent by truck.
Please see below the informations about the truck.

Truck information :

Total weight in charge : 17 tons

Length: 11m, width: 2m55, height : 3m90

Due to the dimensions and weight of the truck, please provide us the best way to reach the concert venue (authorizations).

Also, according to the dimensions of the truck (see above), please foresee a place to park.

STAGE

- ⤴ Stage opening : minimum 10m
- ⤴ Stage depth : minimum 10m from the safety curtain.
- ⤴ The stage floor has to be black. If not: black dance floor and sheet of carpet to protect the dance floor from the instruments stands.
- ⤴ Side pannels and taps.
- ⤴ Cyclorama on upstage and a curtain rail to frame the projection.
- ⤴ We will have water on stage, for that we use our own pool. The size of that pool can be between 6m and 8m per side. Foresee a way to fill it. We will have a polyane to protect your stage from a possible leakage. You can also use your dance floor for that.
- ⤴ One control on the off right or left to handle the infusion bag that will we placed in the middle of the pool.
- ⤴ Please foresee a storage area in order to have the flight cases near the stage.
- ⤴ 2 direct power supply lines on stage for the vibraphones on the down right and right center.
