1 sound manager or Simon Steen-Andersen

1 tour manager

TRANSPORTATION

All Percussions de Strasbourg equipment will be transported by van with tailgate.

Truck Specification:

Dimensions: L 6m, W 2.50m, H 3.90m

Provide a secure place to park the truck taking into account the dimensions of the truck (see above).

STAGE:

Necessary dimensions of the stage cage:

- From wall to wall, 17m
- Depth, 15m from the stage frame
- The pipes for the red curtain has to be at 4m high and the one on the back needs teaser over it.

Dimensions and specifications of the play space:

- Opening to the stage frame 12m maximum
- Depth 10m
- The entire playing area is filled with water, 2cm high maximum. To do this, we will use a dance floor. Pipes 5cm diameter placed below the dance floor and around the edge of the play area will act as a ledge. Provide a polyane to place under the dance floor to protect the floor.

IMPORTANT : AN ARRIVAL AND EVACUATION OF WATER NEAR THE PLATEAU WILL BE NECESSARY. TO EMPTY THE POOL WE WILL NEED WATER VACUUMS.

Sound: see document attached

Micro lines has to mounted before our arrival

The Company will bring:

- 6 hoverboard equipped with T-bone CC100 pickups
- 3 whip with DPA 4060 pickups (only two of them have the DPA 4060, the third has to be provide by the venu)
- 1 Marimba
- 3 sets of rattlesnakes
- 2 large stands with plate bells
- 3 small tables
- 2 percussion tablets
- 1 crank machine
- 1 dummy to be suspended and controlled via a system of stilts and pulleys.
- Red curtains 4m high (length 12m at the bottom, 7m on the sides)

Light: see document attached.

Light has to be mounted and tested before our arrival
